WORK EXPERIENCE

Internship: Acmegrade (Data Science Intern)
Remote | Dec 2023 – Jan 2024
During my training and internship at Acmegrade, I gained hands-on Experience in SQL, Python, and Advanced Python. I also developed a solid foundation in Statistics and Machine Learning, Learning How to build predictive models and analyze Complex Datasets.

PROJECTS

Car Price Prediction Regression Model - Developed a car price prediction model. The model utilizes machine learning algorithms to analyze various factors, such as car make model, mileage, year, and conditions to predict the price of the car accurately. - The web app allows users to input these details and receive instant price predictions. helping them make informed decisions when buying or selling a car.	Jan 2024
Data Visualization of bird strikes Dashboard - Developed an interactive Dashboard using major concerns of the scientific community with respect to transport scenarios and to the ever-growing. urban areas,On pre-trained data. - An in depth examination of bird strikes in the U.S reveals significant trends over the years, highlighting the need for effective mitigation strategies to enhance aviation safety and reduce economic impacts.
